CPCCCM2010 Work Safely on scaffolding higher than two metres

Overview:

This Nationally Accredited training course specifies the outcomes required to work safely on construction sites where the work activity involves working above two metres from ground level and where fall protection measures are required. It covers safe methods for accessing the work site; and safe methods of moving or passing tools, equipment and materials to heights above two metres, including handling methods that avoid excessive bending or twisting.

The unit supports construction workers operating from scaffolding over two metres in height that has already been constructed with signage and exclusion barriers in place, in order to reach upper storeys or roofs of buildings. It applies to workers who need to control the risk of falling and of falling objects when working on site or removing scaffold components. It applies to construction work on residential and commercial work sites in new construction, renovation or refurbishment, and maintenance projects

Pre-requisites:

Not Applicable

Licence & Regulatory Requirements:

Not Applicable
