

PUAEQU001 Prepare, maintain and test response equipment (Height Safety Equipment Inspection)

Overview:

This Nationally Accredited training course will give participants the skills and knowledge required to inspect, maintain and test a range of equipment. It includes inspecting response equipment, testing response equipment and cleaning, maintaining and restowing equipment/devices/tools.

While this course provides the training and qualification for height safety equipment inspection, participants will require experience with height safety equipment to further familiarise themselves with the common faults, wear and damage to look for when inspecting equipment. For example, working in a construction site where height safety equipment is used.

This course includes an online practical component. This takes the form of a **video assessment**, where participants are to demonstrate cleaning and inspection methods. To remain current and updated within the industry it is recommended that participants complete this course every 2 years.

Pre-requisites:

Participants must have basic computer skills and access to a reliable computer with internet access, email access and a method of filming themselves (mobile phone, laptop/computer with webcam etc.) where they can be seen and heard clearly.

Participants will also require access to a simulated work environment, as well as one of the following pieces of equipment that you will be required to inspect as part of your assessment:

- Harness
- Lanyard
- Sling
- Helmet
- Kernmantle/Hawser laid/Steel wire rope
- Fall arresters
- Buckle
- Carabiners
- Mallions
- Snaphooks

Licence & Regulatory Requirements:

There are no specific licensing requirements for enrolling in or completing this course.

To remain current and updated within the industry it is recommended that participants complete this course every 2 years.

Units of Competency:

On successful completion participants will be issued with a statement of attainment with the following unit:
PUAEQU001 Prepare, maintain and test response equipment

Delivery method:

Option 1: Online/self-paced, the student has **3 months** to complete from enrolment

The typical duration of this course is between 2-4 hours (based on experience). This course includes an online practical component. This takes the form of a video assessment, where participants are to demonstrate cleaning and inspection methods.

Support for this online training is done via email with an assessor.

You can start your online training as soon as you complete payment for the course. You will have access to all your learning resources and assessments via your online portal and can complete the course at your own pace, so you have the opportunity to accelerate your learning and finish this course as quickly as you like!

Option 2: Classroom (group bookings only)

Fees and charges:

Option 1: \$175

Option 2: Group bookings only. Please contact us for pricing

Fees include all assessments and resources provided online, however students are required to source their chosen piece of equipment for the cleaning and inspection portion of this course.

Refund, Cancellation and Transfer Policy

Please take the time to familiarise yourself with our refund and cancellation policy on page 8 & 9 of our Student Handbook <https://atiaustralia.edu.au/student-handbook>. This handbook also includes more details on training and support services, as well as our terms and conditions. **Note for international students – we are not CRICOS registered, please check your visa requirements for enrolment. We cannot accept international students who are on a student visa if your visa specifies that you must study with a CRICOS provider.**
