

PUAEQU001 Prepare, maintain and test response equipment (Height Safety Equipment Inspection)

Overview:

This nationally accredited training course will give participants the skills and knowledge required to inspect, maintain and test a range of equipment. It includes inspecting response equipment, testing response equipment and cleaning, maintaining and restoring equipment/devices/tools.

While this course provides the training and qualification for height safety equipment inspection, participants will require experience with height safety equipment to further familiarise themselves with the common faults, wear and damage to look for when inspecting equipment. For example, working in a construction site where height safety equipment is used. This course includes an online practical component. This takes the form of a video assessment, where participants are to demonstrate cleaning and inspection methods.

Pre-requisites:

Participants must have basic computer skills and access to a reliable computer with internet, email access and a method of filming themselves where they can be seen and heard clearly. Participants will also require access to a simulated work environment, as well as one of the following pieces of equipment that you will be required to inspect as part of your assessment:

- Harness
- Lanyard
- Sling
- Helmet
- Kernmantle/Hawser laid/Steel wire rope
- Fall arresters
- Buckle
- Carabiners
- Mallions
- Snaphooks

Licence & Regulatory Requirements:

Not applicable

Units of Competency:

On successful completion participants will be issued with a statement of attainment with the following units:
PUAEQU001 Prepare, maintain and test response equipment
